This particular team is not back. They phoned this info in for faster response. But yes all assessments are going into RM. Our contractor is entering both DW and WW as quickly as they can including the photos

Mark

Subject: M6H1 – Harvey Response: System

Letty,

Meaghan received a call from one of our assessment teams (Kathleen Campbell of TCEQ – 979-482-7397) regarding Lone Willow MHP (TX1010664). She said the system had been submerged but never went on a BWN. She stated that they should be on one at this point.

Thanks,

Mark McCasland
